Ilex Anastigmat Series A F:4.5

For high speed, press, studio, group and home portraiture, also commercial and general view work, this series will be found very desirable.

The four larger sizes are equipped with a diffusing device which makes them ideal for studio and home portraiture. This diffusion attachment enables the operator to procure an even degree of diffusion or softness over the entire plate which is so much desired in portraiture.

The above represents our NEW STUDIO MODELS which are designed specially to take care of all classes of Studio Work.

No. 5 STUDIO SHUTTER is equipped with a new patented iris diaphragm which can not get out of order; also with a focusing device which can be operated by hand or release.

No. 5 SPEED SHUTTER also has the new patented iris diaphragm and operates at the following automatic speeds: 1 sec., ½ sec., 1/5 sec., 1/10 sec., 1/25 sec., 1/50 sec., 1/100 and T & B.

No. 7 STUDIO SHUTTER is of the same construction as the No. 5 Studio model.

The No. 7 SPEED SHUTTER embodies the combined features of both the regular Studio model and Speed model. Its automatic speeds range from 1 second to 1/100th and T & B. Entirely independent of this speed disk, is an arrangement for focusing, and operating shutter at Bulb only, as in the regular studio model shutters.
